

School of Information and Physical Sciences
Semester 2, 2024 - COMP2240 - Operating Systems
Assignment 2 Draft Marking Breakdown

A - Algorithms (70%)

Problem 1 – (Semaphore use, Deadlock, Starvation Free)	35%
Problem 2 – (Monitor use, Correct Synchronisation, Starvation Free)	35%

B - Code Form & Output (10%)

Readability, Consistency, Appropriate Commenting	10%
Is the output presented in the same manner as the sample?	

C – GenAI Report (20%)

Length, Format, Does it satisfy the report specification?	20%
---	------------

Note

If you did not use any GenAI tool, you still need to write a report. Please check Assignment specification for information on that. In that case, your mark breakdown will be adjusted accordingly.

Deductions

Deductions will be applied for invalid results, incorrect submission standards, failure to compile, failure to execute to completion, failure to correctly follow specifications.

If your assignment is not prepared and submitted following the specification and instructions therein, you could lose most of your marks despite your algorithms being correct.

Assignments submitted after the deadline will have the final result reduced by 10% of the maximum possible marks per day late. A ‘day’ begins at 12:00 Midnight, and once this time is passed, the penalty for the whole day is applied (*within reason; there is a grace period immediately after the deadline*).
